Yes, it's confusing because there is a second entry for PFAS on the PA Issues list with just PA specific sites. We will put that one together, I guess and include more site specific details.

Add your stuff next to Steve's existing summary and then send it back to me at we will update with more on HSCD sites.

We developed a new database that we are keeping with information about all the PFAS sites – HSCD sites and WPD sites. We can mention that in the hot issues paper.

Kristeen,

Attached is the list of topics we discussed for the transition hot issues. For PFAS, it does list a number of sites but not all, so I'm not sure who came up with the list. I copied that from the attached word doc and pasted, below.

- PFCs: PFOS, PFOA and GenX
  - Sites: Not responsive based on revised scope. Washington Works
  - Not responsive based on revised scope.
